Describe present and historic physical appearance.

This 6.5 mile (10.5 km) section of Rural Route 66 is used today as a local access road. The road is paved with asphalt, except for a 3.3 mile segment that is covered with Portland cement. Standard concrete box culverts span several washes. The pavement has been in place since this was officially Route 66. Aside from some patch repairs, the roadway has changed little in appearance since the historic period.

This section of road was built in 1931 as part of Forest Aid Project 89-E. The 24' wide oil surfaced (later asphalt surfaced) roadway replaced a circa 1920 alignment located to the south. The magazine Arizona Highways proclaimed that construction of this section would ". . . eliminate 18 miles of narrow, crooked, poorly surfaced road which is particularly dangerous in dry weather due to raveling and innumerable potholes". The new road featured a straight alignment, improved road surface, and standard concrete box culverts. The 1931 realignment through the community of Parks (then called Maine) moved Route 66 a few feet south of the existing businesses which had grown up along both sides of the earlier alignment. The focus of the community then shifted to the south. The principal business today is the Parks in the Pines general store and Post Office, in place since 1933.

The road passed through the scenic high country of the Coconino Plateau: beginning at the open watered meadows of Pitman Valley, ascending Oak Hill to Garland Prairie Vista, and ending at the small community of Parks. Several tourist-related facilities along the roadside remain standing today, although some are no longer in use.

This section of Route 66 was upgraded in 1939 and 1941. Work in 1939 included excavating deeper through and bank cuts to lessen grades, new pavement (including several miles of Portland cement paving, still extant), some new culverts, and guard rails. Nearly all of the work was contained within the existing 1931 right-of-way, except for one mile east of Parks, which was realigned slightly to the south in 1941 (thereby creating "Abandoned Route 66: Parks (1931)--see separate nomination form). One mile of this realignment is still in active use and is included within the nominated property.

This property was abandoned to Coconino County with completion of Interstate 40 in 1964. Coconino County maintains it under an easement agreement with the Kaibab National Forest and private property owners. It is actively used as a local access road.

NATIONAL REGISTER OF HISTORIC PLACES
CONTINUATION SHEET

Section number 8 Page 2

The Parks section is an excellent example of Rural Route 66. The cross-section template and pavement from the historic period remain intact. A drive down this part of old Route 66 imparts a strong feeling of historic association to the traveler. It retains integrity of design, workmanship, location, feeling, association, and setting.

Verbal Boundary Description

This property is a 6.5 mile (10.5 km) long section of Rural Route 66 (Forest Road 146) in the vicinity of Parks, AZ maintained by Coconino County. The east end is defined by obliterated Route 66 and the west end is defined by the end of the original alignment (see UTM references). The sides are defined by the original right-of-way, 66 feet to each side of the centerline (marked in this section by steel I beams). See attached map. |_ | See continuation sheet

Boundary Justification

The boundary includes the property type "Rural Route 66" defined in the multiple property form. All improvements associated with this property are contained within the original right-of-way. |_ | See continuation sheet

Verbal Boundary Description

This property is a 5 mile (8 km) long section of Rural Route 66 (FR 146) maintained by Coconino County. The east end is defined by the Kaibab NF boundary and the west end is defined by "Abandoned Route 66: 1931 Parks" (see separate property nomination) The sides are defined by the original ROW, 66 feet to each side of the centerline. (See UTM references and attached map.)

See continuation sheet

Boundary Justification

The boundary included the property type "Rural Route 66" defined in the multiple property form. All improvements associated with this property are contained within the 132 foot wide ROW. The east end is defined by a political boundary and the west end is defined by a different property type. Access to the west end of this property is from "Rural Route 66: Parks" via a 200 foot long non-historic connecting road. See attached map for spacial relationship.
