8. Statement of Significance

Applicable National Register Criteria (Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

XX A Property is associated with events that have made a significant contribution to the broad patterns of our history.

___ B Property is associated with the lives of persons significant in our past.

___ C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.

___ D Property has yielded, or is likely to yield information important in prehistory or history.

Criteria Considerations (Mark "X" in all the boxes that apply.)

___ A owned by a religious institution or used for religious purposes.

___ B removed from its original location.

___ C a birthplace or a grave.

___ D a cemetery.

___ E a reconstructed building, object, or structure.

___ F a commemorative property.

___ G less than 50 years of age or achieved significance within the past 50 years.

CONTINUATION SHEET

Spraker Service Station
name of property
Craig County, Oklahoma
county and State

SUMMARY

The Spraker Service Station, constructed circa 1927, is a one-story, brick service station built in the Tudor Revival style of architecture. It has a side-gabled roof combined with a dominant front-facing gable. The entry is located in the front-facing gable wing. The building is located on the edge of the central business district of Vinita, Oklahoma, along Route 66. The Spraker Service Station maintains a high degree of architectural integrity.

DESCRIPTION

The Spraker Service Station is a one-story, brick, Tudor Revival style service station. Built in about 1927, the station has a steeply pitched, side-gabled roof combined with a steeply pitched, front-facing gable. Faced with both dark and light colored brick, the dark brick forms a three foot band around the lower part of the building. The light brick extends into the gable ends.

The entry is a single glass and aluminum door. Directly adjacent to the entry is a fixed, aluminum and glass display window, which is divided vertically into two parts.

Under the side-gabled roof is the garage. The garage door has been removed, and the door opening has been infilled with vertical, wooden siding with two narrow, fixed, aluminum and glass windows.

The side elevations remain unchanged with alternating fixed and double-hung wooden windows, with brick sills and lintels. Small, vertical vents with brick sills and lintels are located in the upper part of the gable ends.

ALTERATIONS/ADDITIONS

The Spraker Service Station remains virtually unchanged except for the replacement of the garage door with vertical siding. The entry door was originally a glazed, wooden panel door and the window was a wooden, single pane display window. The entry door and display window have been replaced with glass and aluminum. These alterations have no significant effect on the dominant architectural features of the station, such as the steeply pitched roof and colored brick. The Spraker Service Station continues to maintain its architectural integrity.
The Spraker Service Station on Route 66 in Vinita, Oklahoma, is historically significant for its association with Route 66 and as an excellent example of the "house with bays" type of service station, designed in a Tudor Revival style. Built about 1927, this station is an example of a type popular during the twenties. Contextually, the Spraker Service Station relates to "Commerce on Route 66 in Oklahoma (1926-1944)" and to the property type of Filling Stations, Service Stations and Garages, subtype "House with Bays."

HISTORICAL SIGNIFICANCE

The 1920s were a time when many new and growing petroleum companies were entering the automobile gasoline market. These companies tried to attract the motoring public by creating a positive and recognizable image. The Spraker Service Station was no different. The Continental Oil Company built the station to sell Conoco gasoline products and the station sold only Conoco products throughout the period it was in operation.

The Spraker Service Station is commercially significant because of its close association to the automobile and the traveling public. Located on Route 66 in Vinita, the station served the needs of tourist as well as the local residents of the town.

Although several agents ran this station, C. T. Spraker was the most noted. After working for Continental Oil several years, he leased this station during the late 1920s and ran advertisements in the local Vinita Daily Journal with the slogan "Spraker Service Satisfies."

In 1930, with the opening of Hotel Vinita a few blocks away, an even greater number of tourists stopped for gasoline and repairs at the Spraker Service Station. In 1942 with the second World War underway, the station's business decreased but it continued in use as a gasoline outlet until 1985.

The Spraker Service Station is an example of the "house with bays" type of service station designed in the Tudor Revival cottage style. The Spraker Service Station is an excellent example of the petroleum company's first attempts to captivate the public with a home-away-from-home approach and the early beginnings of the standardized approach to marketing. The Spraker
Service Station is one of the few remaining "house with bays" type stations along Route 66.
